

# Master Thesis - Security Aspects in Virtual Networks

## **SITREP 7**

**Laurent De Wilde**

Master of Science in the Applied Computer Science  
Vrije Universiteit Brussel

February 23, 2015

### **1 Work done**

This is an overview of the work done:

- Second chapter almost finished that provides an in-dept text about machine virtualization, storage virtualization and network virtualization.

### **2 Planning**

Finishing chapter 2 and beginning with chapter 3 about security in virtual networks.

### **3 Problems**

No problems encountered.

### **4 Issues**

No issues encountered.

### **5 Assistance**

By the end of next week, (when my theoretical study is finished), I most likely will sent the Professor an e-mail to make an appointment to review my work so far and to discuss the practical testing that needs to be performed.
