

# Master Thesis - Security Aspects in Virtual Networks

## **SITREP 3**

**Laurent De Wilde**

Master of Science in the Applied Computer Science  
Vrije Universiteit Brussel

December 1, 2014

### **1 Work done**

This is an overview of the accomplished work:

- Monday November 24: I returned to the Ems Lab to continue the installation of Windows Server 2012 on the ‘pizza server’ and this time, the installation completed successfully. However, since I did not have a wired network connection, I was unable to install Hyper-V.
- I contacted Ms. Fei Guan to install the server and the router in the datacenter next week.

### **2 Planning**

Together with Ms. Fei Guan, I will install the router and server in the datacenter this Tuesday (December 2).

### **3 Problems**

No problems encountered.

### **4 Issues**

No issues encountered.

### **5 Assistance**

For now, no assistance is needed.
