

Master Thesis - Security Aspects in Virtual Networks

SITREP 4

Laurent De Wilde

Master of Science in the Applied Computer Science
Vrije Universiteit Brussel

December 8, 2014

1 Work done

This is an overview of the accomplished work:

- The server is installed in a slot of a rack in the datacenter with help of Ms. Fei Guan and Mr. Long Peng. They have also assigned some IP addresses.

2 Planning

Due to deadlines for other projects, I will unfortunately not be able to work for my thesis.

3 Problems

No problems encountered.

4 Issues

No issues encountered.

5 Assistance

For now, no assistance is needed.
