Master Thesis - Security Aspects in Virtual Networks
SITREP 5

Laurent De Wilde
Master of Science in the Applied Computer Science
Vrije Universiteit Brussel

February 9, 2015

1 Work done

This is an overview of the accomplished work so far in the first semester:

- Microsoft Windows Server 2012 is freshly installed on the pizzaserver.

- The 1U pizza server is installed in a slot of a rack in the datacenter with help of Ms. Fei Guan and Mr. Long Peng. They have also assigned some IP addresses.

- The NetGear router's firmware is updated to it's latest version and installed in the datacenter.

2 Planning

For the next 3 or 4 weeks, I would like to begin searching for documentation about security problems regarding virtual networks and writing the findings down in a report.

3 Problems

No problems encountered.

4 Issues

No issues encountered.

5 Assistance

For now, no assistance is needed.
